

DB119: Protein C-tag (E12)

Background:

Protein C is a vitamin K-dependent serine protease that regulates blood coagulation by inactivating factors Va and VIIIa in the presence of calcium ions and phospholipids.

Origin:

Protein C-tag (E12) is provided as an affinity purified rabbit polyclonal raised against a synthetic peptide, EDQVDPRLIDGK, derived from the heavy chain of human Protein C.

Product Details:

Each vial contains 200 µg/ml of affinity purified rabbit IgG, Protein C-tag (E12) DB119, in 1 ml PBS containing 0.1 % sodium azide and 0.2% gelatin.

Specificity:

Protein C-tag (E12) DB119 recognizes proteins that contain the Protein C epitope tag.

Use:

Protein C-tag (E12) DB119 is recommended for use by western blotting and ELISA. The suggested western blotting starting dilution is at 1:400.

Storage:

Store this product at 4° C, do not freeze. The product is stable for one year from the date of shipment.
